PROFESSIONAL SUMMARY

Client-facing software engineer with a record of shipping AI-powered integrations from prototype to production. At Advice Bytes, embedded with a startup team to build an AI customer support system from scratch (Claude API + RAG pipeline) - delivered in 6 weeks, achieving 30% inbound ticket reduction. At NomadEire, acted as sole product owner and engineer across multiple production systems. Strong across JavaScript/TypeScript, Python, and REST API integration. MSc CS from UCD (2:1, 2025). Experience navigating cross-functional teams - comfortable working directly with founders, customers, and engineering teams simultaneously.

CORE COMPETENCIES

Client-Facing Delivery

AI Integration (Claude, OpenAI)

Rapid Prototyping

REST API Design

JavaScript / TypeScript

Python

React

Node.js

RAG Pipelines

Cross-Functional Communication

Product Ownership

AWS / Docker

PostgreSQL

EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer - Dublin, Ireland

- NomadOps** - end-to-end product delivery as sole engineer and product owner: gathered requirements from non-technical stakeholders, sprint-planned, and shipped an internal operations platform in TypeScript/React/Node.js. Weekly demo cadence to keep stakeholders aligned.
- Sentinel-AI** - AI compliance pipeline shipped to production: 84% document classification accuracy, 60% reduction in manual review; Python classifier + confidence-threshold HITL routing + REST API for human reviewers.
- Venturella** - full payment integration: Stripe REST API + webhooks + reconciliation engine, sub-200ms PostgreSQL under concurrent load, idempotency guarantees; TypeScript/Node.js.
- Kafka Ad Engine** - real-time event processing: 10,000 events/min at sub-100ms latency using Apache Kafka and Elasticsearch.

Advice Bytes May 2025 - Aug 2025

AI Software Engineer - Dublin, Ireland

- Embedded with a startup team to build AI-powered customer support: multi-turn conversation flows (Claude API + OpenAI API), context-window management, HITL escalation. Shipped prototype to production in **6 weeks**.
- RAG pipeline on Supabase vector store; GDPR intent classifier (87% accuracy) - cross-functional delivery with Customer Success and Data teams.
- Reduced inbound support tickets by **30%** in month one. Maintained system post-launch, resolved three prompt regressions through weekly eval cadence.

Accenture Oct 2023 - Aug 2024

Packaged App Developer - India

- Developed Java/Spring Boot microservices for a major financial client across full SDLC; REST API development, integration testing, CI/CD automation.

PROJECTS

Advice Bytes AI Support System Client AI Integration

End-to-end AI customer support chatbot: Claude API + OpenAI API + RAG retrieval. Deployed as live customer-facing product. 30% inbound reduction · 87% GDPR accuracy. 6-week prototype-to-production cycle.
Claude API · OpenAI API · RAG · Supabase Vector · Python · TypeScript · Node.js

Sentinel-AI Production

AI-powered compliance pipeline with REST review interface. HITL routing for confidence tiers. 84% accuracy · 60% manual review reduction.
Python · scikit-learn · REST API · AWS Lambda · PostgreSQL

Venturella API Integration

Full payment layer: Stripe REST API, webhooks, reconciliation, sub-200ms PostgreSQL under load. Zero payment errors in production.
TypeScript · Node.js · Stripe API · PostgreSQL

EDUCATION

MSc Computer Science - University College Dublin (UCD) 2024-2025
Grade: 2:1 (Upper Second Class Honours) · Dublin, Ireland
BTech Computer Science - Graphic Era University 2019-2023
CGPA: 9.2/10 · India

CERTIFICATIONS

AWS Certified Cloud Practitioner (in progress) 2026

SKILLS

Languages: JavaScript, TypeScript, Python, Java, Swift, SQL Frontend: React, Tailwind CSS, Electron
Backend: Node.js, Spring Boot, REST APIs, Microservices
AI/LLM: Claude API, OpenAI API, Gemini API, RAG, Prompt Engineering, Agent Workflows, NLP, scikit-learn
Data/Infra: Apache Kafka, Elasticsearch, PostgreSQL, Supabase, AWS (EC2, S3, Lambda, API Gateway), Docker
