Dublin, Ireland (Stamp 1G - right to work in Ireland)

PROFESSIONAL SUMMARY

AI engineer specialising in LLM API integration and agentic workflow systems, with production deployments achieving 84% classification accuracy and 30% support ticket reduction. Built multi-turn agent pipelines using Claude API and OpenAI API with RAG retrieval, HITL escalation, and prompt engineering at Advice Bytes. Full-stack TypeScript/Node.js background across event-driven systems (Kafka, 10k events/min), payment infrastructure (sub-200ms PostgreSQL), and end-to-end product delivery. MSc CS from UCD (2:1, 2025). Based in Dublin with full right to work in Ireland - no sponsorship needed.

CORE COMPETENCIES

LLM APIs (Claude, OpenAI, Gemini)

Agent Architectures

RAG Pipelines

Prompt Engineering

TypeScript / Node.js

React

REST API Design

Vector Databases

Production AI Deployment

Python / scikit-learn

Apache Kafka

PostgreSQL / Supabase

AWS (Lambda, EC2, S3)

Docker

EXPERIENCE

NomadEireOct 2025 - Present

Software Engineer - Dublin, Ireland

- Sentinel-AI** - production AI compliance pipeline: 84% document classification accuracy, 60% reduction in manual review workload; Python classifier (scikit-learn), AWS Lambda, PostgreSQL, REST API with confidence-threshold HITL escalation.
- Kafka Ad Engine** - real-time event streaming: 10,000 events/min throughput at sub-100ms end-to-end latency using Apache Kafka, Elasticsearch, Node.js consumers with backpressure handling.
- Venturella** - payment processing layer: Stripe integration, webhook reconciliation, sub-200ms PostgreSQL under concurrent write load; TypeScript/Node.js with idempotency guarantees.
- NomadOps** - internal ops platform: sole engineer + product owner; requirements, sprint planning, and end-to-end delivery in TypeScript/React/Node.js.

Advice BytesMay 2025 - Aug 2025

AI Software Engineer - Dublin, Ireland

- Designed and deployed agentic customer support system: multi-turn conversation flows (Claude API + OpenAI API), explicit context-window management, HITL escalation - achieved **30% reduction in inbound support tickets**.
- Built RAG pipeline on Supabase vector store (dense + keyword retrieval); NLP-based GDPR intent classifier reaching **87% accuracy**.
- Prompt engineering and eval loop: weekly sample reviews caught three prompt regressions before user impact; reduced irrelevant escalations ~40%.

AccentureOct 2023 - Aug 2024

Packaged App Developer - India

- Developed enterprise Java/Spring Boot microservices for a major financial client; full SDLC from design to production deployment.
- REST API development, integration testing, CI/CD pipeline automation.

PROJECTS

Sentinel-AI Production

AI-powered immigration document compliance pipeline. Multi-class classification with confidence-threshold routing; human-in-the-loop escalation for low-confidence cases. **84% accuracy, 60% manual review reduction.**
Python · scikit-learn · AWS Lambda · PostgreSQL · REST API

Advice Bytes Chatbot Agentic AI

Multi-agent customer support chatbot with RAG retrieval and GDPR compliance classifier. **30% inbound reduction · 87% GDPR intent accuracy.** Prompt eval loop prevented 3 production regressions.
Claude API · OpenAI API · RAG · Supabase Vector · Python · TypeScript

Kafka Ad Engine Real-Time

Real-time event streaming pipeline. **10,000 events/min · sub-100ms latency.** Kafka partition strategy + Elasticsearch indexing + Node.js consumers with backpressure.
Apache Kafka · Elasticsearch · Node.js · TypeScript

EDUCATION

MSc Computer Science - University College Dublin (UCD) Grade: 2:1 (Upper Second Class Honours) · Dublin, Ireland	2024-2025
BTech Computer Science - Graphic Era University CGPA: 9.2/10 · India	2019-2023

CERTIFICATIONS

AWS Certified Cloud Practitioner (in progress)	2026
--	------

SKILLS

AI/LLM: Claude API, OpenAI API, Gemini API, RAG, Prompt Engineering, Agent Workflows, NLP, scikit-learn, Vector Databases
Languages: TypeScript, JavaScript, Python, Java, Swift, SQL **Frontend:** React, Tailwind CSS, Electron
Backend: Node.js, Spring Boot, REST APIs, Microservices
Data/Infra: Apache Kafka, Elasticsearch, PostgreSQL, Supabase, AWS (EC2, S3, Lambda, API Gateway), Docker
Tools: Git, CI/CD, Playwright, Agile/Scrum
