PROFESSIONAL SUMMARY

PostgreSQL and Supabase engineer with production experience across database-backed AI systems, real-time infrastructure, and payment processing. Built an AI RAG pipeline on Supabase vector store (Advice Bytes: 30% support reduction, 87% GDPR accuracy) and a high-performance payment layer with sub-200ms PostgreSQL under concurrent write load (Venturella). TypeScript/Node.js primary stack; Python for ML/AI pipelines. Comfortable advising engineering teams on database architecture and LLM integration patterns. MSc CS from UCD (2:1, 2025). Remote EMEA-based in Dublin - no relocation needed.
