PROFESSIONAL SUMMARY

Backend Engineer with production experience in Java, Spring Boot, Apache Kafka, and AWS microservices. Built a Kafka Ad Engine processing **10,000 events/min at sub-100ms latency**. Shipped enterprise REST APIs at Accenture across Spring Boot microservices consumed by 3 downstream systems. MSc CS UCD 2025. Dublin-based, full work authorisation. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

Java + Spring Boot

Apache Kafka / Event-Driven

AWS (EC2 / Lambda / S3)

Microservices Architecture

REST API Design

PostgreSQL / Elasticsearch

Docker

API Integration

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer | Dublin, Ireland

- Built backend services for NomadOps using Node.js and Spring Boot, deployed on AWS (EC2, Lambda, API Gateway, S3)
- Designed async job processing with PostgreSQL job state tracking and guaranteed delivery guarantees
- Integrated multi-LLM backend layer (Claude API, OpenAI API) with fallback routing and latency monitoring

Advice Bytes May 2025 - Aug 2025

Software Engineer | Dublin, Ireland

- Designed backend integration layer over Claude API, OpenAI API, and Gemini API with fallback logic and cost controls
- Built Python NLP classification pipeline for GDPR compliance queries achieving **87% classification accuracy**
- Deployed serverless backend on AWS Lambda; reduced inbound support by **30%**

Accenture Oct 2023 - Aug 2024

Packaged App Developer | Bengaluru, India

- Built enterprise REST APIs using Java and Spring Boot; services consumed by 3 downstream systems with zero breaking changes over 12 months
- Developed microservice features within agile sprints; improved API reliability through integration tests and contract validation
- Collaborated with cross-functional teams on architecture decisions and dependency management

KEY PROJECTS

Kafka Ad Engine Scale

Real-time advertising event processing pipeline. Designed Kafka topic architecture, Java Spring Boot producer/consumer services, Elasticsearch indexing layer. **10,000 events/min throughput, sub-100ms end-to-end latency**, zero message loss in production. Deployed on Docker with AWS integration.

Apache Kafka · Java · Spring Boot · Elasticsearch · Docker · AWS · PostgreSQL

Venturella Full-Stack

Full-stack platform with integrated payment infrastructure. Designed Node.js backend, REST API layer, PostgreSQL schema with **sub-200ms query performance**. Stripe webhook handling, payment state machine, and audit logging.

Node.js · PostgreSQL · Supabase · Stripe · REST API · Docker

Sentinel-AI AI

Content moderation backend with REST API layer. Python NLP classification pipeline (scikit-learn) with Claude API integration for edge cases. **84% classification accuracy, 60% manual review reduction**.

Python · scikit-learn · Claude API · REST API · FastAPI · AWS

NomadOps Full Ownership

Built full backend infrastructure as sole engineer: REST APIs, async job processing, multi-provider LLM routing, AWS Lambda functions, and PostgreSQL schema. End-to-end from architecture to production deployment.

Node.js · Java · AWS (Lambda / EC2 / API Gateway / S3) · PostgreSQL · Docker

EDUCATION

MSc Computer Science - University College Dublin (UCD)	2024-2025
Result: 2:1 Distributed Systems, Advanced Algorithms, Cloud Architecture, Machine Learning	
BTech Computer Science - Graphic Era University, India	2019-2023
CGPA: 9.2/10 First Class Honours	

TECHNICAL SKILLS

Backend: Java, Spring Boot, Node.js, FastAPI, REST APIs, Microservices	
Messaging: Apache Kafka, SQS, RabbitMQ, event-driven architecture	
Cloud/Infra: AWS (EC2, S3, Lambda, API Gateway), Docker, Elasticsearch	Databases: PostgreSQL, Supabase, Elasticsearch
Languages: Java, Python, TypeScript, JavaScript, SQL AI/ML: Claude API, OpenAI API, scikit-learn, NLP pipelines
