PROFESSIONAL SUMMARY

AI Solutions Engineer with hands-on production ML and GenAI experience: built and deployed multi-agent LLM pipelines, RAG systems, and LLMOps observability frameworks for real enterprise customers. Deep technical understanding of ML model evaluation, GenAI deployment patterns, and LLM/agentic framework design from production work (not demos). Customer-facing delivery experience from consulting (Accenture) and direct stakeholder collaboration (Advice Bytes, NomadEire). Strong in Python, AWS cloud, scikit-learn, and the Claude API agentic tooling stack. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

ML / GenAI in Production

LLMOps / ML Observability

Claude API / Agentic Frameworks

Python / scikit-learn

AWS Cloud

RAG Systems

Customer-facing Technical Delivery

LLM Evaluation

WORK EXPERIENCE

NomadEire

Oct 2025 - Present

Software Engineer

- Integrated GenAI capabilities with production observability: monitoring LLM output quality, defining accuracy thresholds, and building feedback loops to improve model performance over time.
- Acted as technical advisor to stakeholders -- translating ML system capabilities into business outcomes and presenting performance metrics to non-technical decision-makers.

Advice Bytes

May - Aug 2025

AI Developer Intern

- Deployed production **GenAI system** with multi-layer observability: GDPR classification accuracy monitoring (87%), business impact measurement (30% inbound reduction), and API cost tracking per session.
- Collaborated directly with client executives to define AI transformation roadmap, identify high-leverage use cases, and measure success against business outcomes -- the trusted technical advisor model Arize AI's Solutions Engineers practice.
- Built on **Python, AWS Lambda, and Supabase** with scikit-learn for classification preprocessing steps in the compliance pipeline.

Accenture

Oct 2023 - Aug 2024

Packaged App Developer

- Delivered enterprise solutions in client-facing consulting engagements -- developed technical presentation skills and the ability to lead strategic business reviews with executive stakeholders.
- Built **Java Spring Boot** backend services used by enterprise customers, gaining exposure to enterprise ML/AI integration patterns.

KEY PROJECTS

Sentinel-AI 84% ACCURACY · LLMOPS PIPELINE

Multi-agent GenAI compliance pipeline with per-stage ML observability: accuracy benchmarking at each agent step, automated evaluation against ground truth dataset, and deployment guardrails. 84% document analysis accuracy, 60% manual review reduction -- the kind of production ML system Arize AI's platform monitors.

Stack: Claude API, Python, FastAPI, Docker, PostgreSQL, scikit-learn

Advice Bytes AI Chatbot 30% BUSINESS IMPACT

Production RAG system with LLMOps observability: three-layer monitoring stack (business, system, cost metrics), eval-driven iteration, and GDPR classification accuracy tracking at 87%. Direct analogue to what Arize AI helps enterprise ML teams achieve.

Stack: Claude API, Python, AWS Lambda, Supabase, scikit-learn

Kafka Ad Engine 10K EVENTS/MIN

High-throughput ML feature pipeline processing 10,000 events per minute -- demonstrates production ML infrastructure engineering and the performance monitoring mindset that ML observability platforms like Arize AI target.

Stack: Apache Kafka, Python, Elasticsearch, Docker

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
