PROFESSIONAL SUMMARY

Full-stack software engineer with production experience across TypeScript, React, Node.js, PostgreSQL, AWS, and Docker -- an exact match for Enode's technology stack. Built and shipped end-to-end products as sole engineer and product owner at NomadEire, achieving sub-200ms PostgreSQL performance in Venturella, and deploying event-driven systems processing 10,000 events per minute. Remote-first worker with proven async delivery discipline. Passionate about clean energy infrastructure and the role software plays in enabling the energy transition. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

TypeScript / JavaScript

React

Node.js

PostgreSQL / SQL

AWS (Lambda, EC2, S3, API Gateway)

Docker

REST APIs

Event-driven Architecture

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Built NomadOps end to end as sole engineer and product owner: **TypeScript React** frontend, **Node.js** REST API backend, **PostgreSQL** data layer, deployed on **AWS**.
- Configured AWS infrastructure (EC2, S3, RDS, API Gateway) with IAM security policies and CloudWatch monitoring for a production system serving real users.
- Delivered independently with an async-first workflow -- documenting decisions, communicating status in writing, and shipping iteratively without a management layer.

Advice Bytes May - Aug 2025

AI Developer Intern

- Shipped a production **Python/Node.js** system on **AWS Lambda** and API Gateway that reduced customer inbound support by 30% -- deployed, monitored, and iterated on a live service.
- Built with Supabase (**PostgreSQL**) for data persistence and integrated external APIs (Claude, AWS services) within a containerised development environment.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Delivered enterprise features using **Java Spring Boot** in Agile cross-functional teams, developing strong habits around testing, code review, and production-quality delivery.

KEY PROJECTS

NomadOps FULL STACK · AWS PRODUCTION

Complete product delivered as sole engineer: TypeScript React frontend, Node.js REST API, PostgreSQL database, and AWS deployment (EC2, S3, RDS). Full ownership from discovery to production rollout with async-first delivery discipline.

Stack: TypeScript, React, Node.js, PostgreSQL, AWS

Venturella SUB-200MS POSTGRESQL

Full payment platform with sub-200ms PostgreSQL query performance under production load -- achieved through EXPLAIN ANALYZE query optimisation, targeted indexing, and schema design aligned to access patterns.

Stack: TypeScript, React, Node.js, PostgreSQL, Stripe

Kafka Ad Engine 10K EVENTS/MIN · SUB-100MS

Event-driven data pipeline processing 10,000 events per minute at sub-100ms latency -- directly analogous to Enode's need to handle telemetry from connected energy devices at scale. Containerised with Docker for reproducible deployments.

Stack: Apache Kafka, Python, Elasticsearch, Docker

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
