PROFESSIONAL SUMMARY

Junior backend cloud engineer with hands-on experience building secure, scalable microservices on AWS, Python, TypeScript, and Docker. Built compliance-sensitive production systems with GDPR as a primary design constraint (87% compliance accuracy), containerised multi-service architectures using Docker Compose, and deployed serverless backends on AWS Lambda and API Gateway. Strong PostgreSQL performance engineering and event-driven system design experience from high-throughput Kafka pipelines. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

Backend Cloud Engineering

Python / TypeScript

AWS (Lambda, EC2, S3, API Gateway)

Docker / Microservices

PostgreSQL

Security-aware Development

Event-driven Architecture

REST APIs / FastAPI

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Designed and deployed backend cloud architecture on **AWS** -- Lambda, RDS (PostgreSQL), S3, and API Gateway -- with security and reliability as primary design principles.
- Built complete **Node.js/TypeScript** backend with RESTful API layer, database schema design, and containerised development environment for consistent deployments.
- Owned the full infrastructure lifecycle as sole engineer: provisioning, monitoring, and security configuration for a production system serving real users.

Advice Bytes May - Aug 2025

AI Developer Intern

- Engineered a production system with **GDPR compliance as a hard constraint** -- designed the data pipeline to prevent PII leakage, achieving 87% accuracy on compliance classification.
- Deployed **Python backend on AWS Lambda and API Gateway** with proper IAM role scoping, achieving 30% reduction in inbound customer support volume.
- Integrated Supabase (PostgreSQL) for vector storage and relational data with security-conscious schema design.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Built enterprise backend services with **Java Spring Boot** in security-focused enterprise environments, following Agile delivery and code review practices.
- Gained experience with enterprise-grade security requirements, access control patterns, and audit logging in high-stakes business applications.

KEY PROJECTS

Sentinel-AI 84% ACCURACY · DOCKER MICROSERVICES

Multi-agent compliance pipeline with all services containerised using Docker Compose. Security-aware architecture with audit trail logging, role-based access, and PostgreSQL data isolation. Achieved 84% document analysis accuracy and 60% manual review reduction.

Stack: Python, FastAPI, Docker, PostgreSQL, Claude API

Kafka Ad Engine 10K EVENTS/MIN · SUB-100MS

Event-driven backend infrastructure processing 10,000 events per minute at sub-100ms latency. Designed ingestion pipeline with fault-tolerant message processing using Kafka offset management and containerised Elasticsearch.

Stack: Apache Kafka, Python, Elasticsearch, Docker

Venturella SUB-200MS POSTGRESQL

Full payment platform backend with sub-200ms PostgreSQL query performance achieved through query plan analysis, index optimisation, and schema design aligned to access patterns. Includes Stripe API integration with webhook security.

Stack: Node.js, TypeScript, PostgreSQL, Stripe

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
