PROFESSIONAL SUMMARY

Software engineer with a quality-first engineering mindset, strong Python and Java testing skills, and hands-on REST API testing across multiple production systems. Designed and executed compliance test suites achieving 87% GDPR accuracy, performed root cause analysis on production bugs using structured logging and browser developer tools, and wrote automated test coverage for multi-service AI pipelines. Strong CS fundamentals (MSc Computer Science, UCD Dublin 2025), AI fluency, and experience using AI tools actively in quality engineering workflows. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

Test Planning and Execution

Python Test Automation

REST API Testing

Root Cause Analysis

Web Application Testing

Java / Python

CI/CD Integration

AI-assisted QA

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Wrote comprehensive unit and integration test suites for NomadOps using **Jest (TypeScript)** -- covering API endpoints, database interactions, and edge case scenarios.
- Performed root cause analysis on production bugs using CloudWatch logs, browser developer tools, and structured logging -- reduced time-to-diagnosis for production issues.
- Used AI tools (Claude) to generate test case matrices from API specifications, identifying edge cases that manual analysis would have missed.

Advice Bytes May - Aug 2025

AI Developer Intern

- Designed and executed a **GDPR compliance test suite** for the AI chatbot -- achieved 87% compliance classification accuracy through systematic test case design and iterative evaluation.
- Tested REST API endpoints (AWS API Gateway) using Postman and automated scripts, covering authentication, error handling, rate limiting, and response validation.
- Traced and resolved a production classification error using server logs and Python debugging -- identified a tokenisation edge case causing incorrect GDPR categorisation.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Participated in test planning and execution as part of **Java Spring Boot** Agile delivery cycles -- writing unit tests, participating in code reviews, and validating releases before production deployment.
- Gained experience with enterprise-grade testing standards: test-driven development practices, regression suites, and production validation workflows.

KEY PROJECTS

Sentinel-AI Test Suite 84% ACCURACY VALIDATED

Comprehensive testing for multi-agent AI pipeline: unit tests per agent, integration tests for end-to-end pipeline, and accuracy evaluation framework. Validated 84% document classification accuracy through systematic test coverage and data-driven test fixtures in Python pytest. Stack: Python, pytest, Docker, PostgreSQL

Advice Bytes Compliance Testing 87% GDPR ACCURACY

Designed GDPR compliance test suite for production AI chatbot -- systematic test case matrix covering edge cases (mixed language, ambiguous PII, nested documents). Root cause analysis of classification errors using structured logging and Python debugging tools. Stack: Python, AWS CloudWatch, Postman, REST APIs

Venturella API Testing PAYMENT EDGE CASES

Comprehensive REST API test suite for payment platform: duplicate charge prevention, webhook replay protection, concurrent payment handling, and Stripe error scenario coverage. Zero Stripe disputes in first month of production. Stack: TypeScript, Jest, Stripe APIs, PostgreSQL

EDUCATION

MSc Computer Science	2024-2025
University College Dublin (UCD), Ireland	
Grade: 2:1	
BTech Computer Science	2019-2023
Graphic Era University, India	
Grade: 9.2/10 (First Class Honours)
