PROFESSIONAL SUMMARY

Recent MSc Computer Science graduate (UCD Dublin, 2025) with production software engineering experience across distributed systems, cloud-native infrastructure, and applied AI/NLP. Owned infrastructure problems from architecture through production: Kafka-based event pipelines (10k events/min, sub-100ms latency), multi-agent AI systems, and AWS serverless deployments. Proficient in Python, TypeScript/JavaScript, and Java, with deep hands-on AI fluency using Claude API, RAG, and multi-agent workflows. Integrates AI into engineering workflows as a core working practice. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

Python / TypeScript / Java

Distributed Systems

Cloud-native Infrastructure (AWS)

NLP / RAG / ML

Multi-agent AI Systems

Docker / Microservices

PostgreSQL

Data Structures and Algorithms

WORK EXPERIENCE

NomadEire

Oct 2025 - Present

Software Engineer

- Owned infrastructure and product for NomadOps from architecture through production launch: **TypeScript, React, Node.js, PostgreSQL**, and AWS cloud-native stack (EC2, S3, RDS, Lambda, API Gateway).
- Designed system architecture, wrote well-tested production code, set up CI/CD, and maintained production monitoring as sole engineer -- the end-to-end ownership Glean's role describes.
- Used AI tools (Claude API) to accelerate development: generating test suites, debugging complex query plans, and improving code documentation quality.

Advice Bytes

May - Aug 2025

AI Developer Intern

- Applied NLP techniques for intent classification and response generation via **RAG pipeline** using Claude API and Supabase vector store -- deployed to production on AWS Lambda.
- Achieved 30% reduction in inbound support volume and 87% GDPR compliance accuracy through eval-driven iteration on a live AI system.

Accenture

Oct 2023 - Aug 2024

Packaged App Developer

- Developed enterprise backend services with **Java Spring Boot**, writing production-quality, well-tested code in a large distributed engineering team with rigorous code review practices.

KEY PROJECTS

Kafka Ad Engine 10K EVENTS/MIN · SUB-100MS

Distributed event processing infrastructure: designed for partition-based parallelism, fault-tolerant offset management, and consumer group horizontal scaling. Processes 10,000 events per minute at sub-100ms latency -- full infrastructure ownership from architecture to production.
Stack: Apache Kafka, Python, Elasticsearch, Docker

Sentinel-AI 84% ACCURACY · NLP PIPELINE

Multi-agent NLP pipeline for document analysis and compliance classification. Custom agent orchestration using Claude API, with stateless agents, PostgreSQL state management, and Docker microservices. 84% classification accuracy, 60% reduction in manual review.
Stack: Python, FastAPI, Docker, PostgreSQL, Claude API

NomadOps CLOUD-NATIVE AWS

Cloud-native full-stack application on AWS: serverless Lambda functions, managed RDS PostgreSQL, S3 object storage, and API Gateway -- designed for reliability and operational simplicity with full infrastructure ownership.
Stack: TypeScript, React, Node.js, PostgreSQL, AWS

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1 Distributed Systems, Machine Learning, Cloud Computing	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
