PROFESSIONAL SUMMARY

Full-stack software engineer and production AI specialist with a track record of deploying LLM-powered systems into real-world customer environments. Built and shipped a multi-agent AI compliance pipeline (Claude API, FastAPI, Docker, PostgreSQL) achieving 84% accuracy and 60% reduction in manual review, and a RAG chatbot that cut inbound support by 30% at sub-second latency. Experienced across Python, TypeScript, Node.js, React, and AWS, with deep hands-on knowledge of GenAI deployment, eval-driven iteration, and end-to-end system design. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

LLM Production Deployment

Multi-agent Pipelines

Full-Stack Engineering

Python / TypeScript

RAG Systems

System Design

Customer Technical Delivery

PostgreSQL / AWS

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Acted as sole product owner and engineer for NomadOps - ran discovery, defined technical scope, designed architecture, and delivered full production system end to end.
- Built complete platform using **TypeScript, React, Node.js, PostgreSQL, and AWS**, owning all stages from requirements to production rollout.
- Established CI/CD, database migration practices, and production monitoring - the same lifecycle a Forward Deployed Engineer manages for enterprise customers.

Advice Bytes May - Aug 2025

AI Developer Intern

- Deployed a **Claude API RAG chatbot** to production serving real customers, reducing inbound support volume by **30%** and achieving **87% GDPR compliance accuracy**.
- Built with Python, Supabase vector store, AWS Lambda, and API Gateway - designed evaluation framework and iterated based on production feedback.
- Collaborated directly with client stakeholders to align the system on real user needs and measure impact through inbound ticket counts and compliance audits.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Developed enterprise backend services using **Java Spring Boot** within Agile delivery teams, shipping production features to large-scale business clients.
- Gained customer-facing technical delivery experience in a consulting model - defining requirements, managing scope, and presenting solutions to non-technical stakeholders.

KEY PROJECTS

Sentinel-AI 84% ACCURACY · 60% REVIEW REDUCTION

Multi-agent AI compliance pipeline built with Claude API, Python, FastAPI, Docker, and PostgreSQL. Achieved 84% document analysis accuracy and reduced manual compliance review by 60%. Owned architecture, agent orchestration, evaluation framework, and production deployment - directly analogous to FDE delivery scope.

Stack: Claude API, Python, FastAPI, Docker, PostgreSQL

Kafka Ad Engine 10K EVENTS/MIN · SUB-100MS

High-throughput event processing system handling 10,000 events per minute at sub-100ms latency. Designed the ingestion pipeline and optimised for throughput under production load conditions.

Stack: Apache Kafka, Python, Elasticsearch, Docker

Venturella SUB-200MS QUERIES

Full payment platform with sub-200ms PostgreSQL query performance under load. Built complete full-stack system with Stripe integration, TypeScript, React, Node.js.

Stack: TypeScript, React, Node.js, PostgreSQL, Stripe

NomadOps FULL PO + DELIVERY

Full-stack product delivered as sole engineer and product owner - discovery, scoping, architecture, build, and production rollout using TypeScript, React, Node.js, PostgreSQL, and AWS.

Stack: TypeScript, React, Node.js, PostgreSQL, AWS

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
