PROFESSIONAL SUMMARY

Applied AI engineer with a track record of building and deploying production-grade LLM systems, multi-agent pipelines, and AI-powered customer-facing products. Built Sentinel-AI (multi-agent compliance pipeline, 84% accuracy, 60% manual review reduction) using Claude API, Python, FastAPI, and Docker, and deployed a RAG chatbot at Advice Bytes that reduced customer inbound support by 30% in production. Combines technical AI delivery with customer-first outcome thinking, extreme ownership, and the startup pace Percepta values. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

Production LLM Deployment

Multi-agent Pipelines

Claude API / Agentic Workflows

Python / TypeScript

FastAPI / Docker / AWS

RAG Systems

Customer AI Strategy

Extreme Ownership

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Acted as sole product owner and engineer for NomadOps -- the same "extreme ownership" model Percepta's Applied AI Engineers bring to customer engagements.
- Ran discovery with stakeholders, defined AI and product strategy, scoped technical architecture, and delivered the production system using **TypeScript, React, Node.js, PostgreSQL, and AWS**.
- Balanced speed with quality in a startup environment with no safety net -- built CI/CD, monitoring, and testing from scratch.

Advice Bytes May - Aug 2025

AI Developer Intern

- Collaborated with client executives to define the AI transformation roadmap: identified "reduce inbound support" as the high-leverage use case, built and deployed a **Claude API RAG chatbot** that achieved a **30% reduction in inbound support** with **87% GDPR compliance accuracy**.
- Built with Python, Supabase, AWS Lambda, and API Gateway -- shipped from whiteboard to production in three weeks with iterative feedback loops.
- Demonstrated the outcome-first, customer-obsessed delivery model that Percepta's Applied AI Engineer role demands.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Delivered enterprise solutions in client-facing consulting engagements using **Java Spring Boot**, developing the stakeholder communication and delivery discipline that applied AI customer work requires.

KEY PROJECTS

Sentinel-AI 84% ACCURACY · 60% REVIEW REDUCTION

Multi-agent AI compliance pipeline with custom agent orchestration built on Claude API -- comparable to LangGraph agent graph patterns. Each agent specialised for a sub-task (document parsing, compliance classification, audit logging). Achieved 84% accuracy and 60% reduction in manual review. Deployed with FastAPI, Docker Compose, and PostgreSQL.

Stack: Claude API, Python, FastAPI, Docker, PostgreSQL

Advice Bytes AI Chatbot 30% INBOUND REDUCTION

Production RAG chatbot delivering measurable customer AI transformation: 30% inbound support reduction and 87% GDPR compliance accuracy. Defined the use case with the client, built the solution, deployed to production on AWS Lambda, and measured impact through business metrics.

Stack: Claude API, Python, Supabase, AWS Lambda

Kafka Ad Engine 10K EVENTS/MIN · SUB-100MS

High-throughput event processing infrastructure -- demonstrates production systems engineering capability beyond AI, relevant to Percepta's enterprise infrastructure deployments.

Stack: Apache Kafka, Python, Elasticsearch, Docker

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
