PROFESSIONAL SUMMARY

Junior software engineer with practical AWS cloud deployment experience, containerisation using Docker, and Node.js and Python proficiency across multiple production systems. Deployed serverless architectures on AWS Lambda and API Gateway, managed EC2 and S3 resources, and built containerised services using Docker for reproducible production deployments. Strong software engineering fundamentals including version control, testing practices, and Linux-based development environments. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

AWS (Lambda, EC2, S3, API Gateway)

Docker / Containerisation

Node.js / TypeScript

Python

CI/CD Pipelines

Linux Development

REST APIs

Infrastructure as Code

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Designed and deployed NomadOps cloud infrastructure on **AWS** -- selecting EC2, S3, Lambda, and RDS services for reliability and operational simplicity at startup scale.
- Built with **TypeScript and Node.js**, establishing version control workflows, testing practices, and CI/CD pipelines for a production system used by real customers.
- Owned the full deployment lifecycle -- from infrastructure provisioning to production monitoring -- as the sole engineer on the platform.

Advice Bytes May - Aug 2025

AI Developer Intern

- Deployed a serverless production system on **AWS Lambda and API Gateway** -- configured IAM permissions, environment variables, and production monitoring for a live customer-facing service.
- Built with **Python**, integrating with Supabase and the Claude API within a containerised, reproducible development environment.
- Achieved 30% reduction in inbound support and 87% GDPR compliance accuracy -- demonstrating production-quality delivery under real-world constraints.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Developed enterprise backend services with **Java Spring Boot** in Linux-based environments, following Agile delivery practices and version control workflows.
- Gained experience with enterprise-scale software engineering fundamentals: testing, deployment pipelines, and cross-team collaboration.

KEY PROJECTS

Kafka Ad Engine 10K EVENTS/MIN · SUB-100MS

High-throughput event processing infrastructure handling 10,000 events per minute at sub-100ms latency. All services containerised with Docker for reproducible deployments and local development parity.
Stack: Apache Kafka, Python, Elasticsearch, Docker

Sentinel-AI 84% ACCURACY · DOCKER DEPLOYED

Multi-agent AI pipeline with all services containerised using Docker Compose for consistent environments across development and production. Achieved 84% document analysis accuracy with 60% reduction in manual review.
Stack: Python, FastAPI, Docker, PostgreSQL, Claude API

NomadOps AWS PRODUCTION

Full-stack platform deployed on AWS with Node.js backend, React frontend, and PostgreSQL on RDS. Implemented infrastructure provisioning, environment configuration, and production monitoring as sole engineer.
Stack: TypeScript, React, Node.js, PostgreSQL, AWS

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
