PROFESSIONAL SUMMARY

TypeScript-first software engineer with production AI system experience using Claude API, OpenAI API, and Gemini API -- building the same patterns the Vercel AI SDK abstracts: streaming responses, tool/function calling, multi-turn conversation state, and response evaluation. Strong React and Node.js background with a deep TypeScript-first development approach across multiple production projects. Shipped AI-native products to real users with measurable business outcomes: 30% support reduction, 84% compliance accuracy. MSc Computer Science, UCD Dublin 2025. Portfolio: dhruvabisht.com.

CORE COMPETENCIES

TypeScript (Strict Mode)

React / Next.js

AI SDK / LLM Integration

Claude API / OpenAI API

Streaming Responses

Node.js / REST APIs

AWS / Serverless

Open Source Contribution

WORK EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer

- Built NomadOps using **TypeScript (strict mode)** throughout -- React frontend with typed component props, Node.js backend with typed API contracts, and PostgreSQL with type-safe query builders.
- Integrated AI capabilities into the developer workflow: using Claude API for automated code review, generating typed test suites from API specs, and improving developer documentation quality.
- Deployed on AWS with serverless patterns (Lambda, API Gateway) aligned with the cloud-native architecture Vercel's platform targets.

Advice Bytes May - Aug 2025

AI Developer Intern

- Built and shipped an **AI-native product** using Claude API with streaming response patterns, multi-turn conversation management, and retrieval-augmented generation -- the exact patterns the Vercel AI SDK provides at the toolkit level.
- Achieved 30% inbound support reduction and 87% GDPR compliance accuracy -- developer-facing AI tooling that produced measurable outcomes for real users.

Accenture Oct 2023 - Aug 2024

Packaged App Developer

- Built enterprise APIs with **Java Spring Boot** used by development teams across the organisation -- gained experience with developer-facing API design and the responsibility of SDK-like interfaces that others depend on.

KEY PROJECTS

Advice Bytes AI Chatbot 30% SUPPORT REDUCTION

Production AI-native application built with Claude API using streaming responses, multi-turn conversation state, RAG retrieval, and evaluation-driven iteration. Implements the same patterns the Vercel AI SDK abstracts -- from streaming to tool use to response quality measurement.
Stack: Claude API, Python, TypeScript, Supabase, AWS Lambda

Sentinel-AI 84% ACCURACY · MULTI-AGENT

Multi-agent AI pipeline implementing tool use, agent routing, and structured output extraction via Claude API -- parallel to agentic patterns in the Vercel AI SDK. TypeScript-first design with strict typing throughout the API contract layer.
Stack: Claude API, Python, FastAPI, TypeScript, Docker, PostgreSQL

NomadOps TYPESCRIPT FULL-STACK

Complete TypeScript full-stack product: strict-mode TypeScript throughout, typed API contracts between frontend and backend, React with typed component interfaces, and Node.js with Zod validation schemas. Sub-200ms PostgreSQL performance.
Stack: TypeScript, React, Node.js, PostgreSQL, AWS

EDUCATION

MSc Computer Science University College Dublin (UCD), Ireland Grade: 2:1	2024-2025
BTech Computer Science Graphic Era University, India Grade: 9.2/10 (First Class Honours)	2019-2023
