PROFESSIONAL SUMMARY

AI engineer specialising in production-grade agentic AI pipelines and enterprise AI delivery. Built and shipped Claude API (Anthropic) integrations in a live product - one of few engineers in Ireland with direct hands-on experience in the Anthropic ecosystem. Enterprise software background at Accenture across multi-module integrations and large-scale automation. Designs scalable AI solutions end-to-end: architecture, backend systems, and cloud infrastructure on AWS. MSc Computer Science, University College Dublin (2025). Available for hybrid roles across Ireland - no visa sponsorship required.

CORE COMPETENCIES

Agentic AI & GenAI Solutions

Enterprise AI Delivery

AI Solutions Architecture

Anthropic Claude API

AWS Cloud Infrastructure

Systems Design & Integration

Client-Facing Delivery

GDPR-Compliant AI Systems

WORK EXPERIENCE

NomadEire

Oct 2025 - Present

AI Solutions Engineer

- Designed and deployed a **Claude API (Anthropic) content moderation pipeline** into production - architecture decision, integration, and ongoing ownership
- Architected payment transaction layer integrating Stripe, PayPal, and a custom gateway with the AI moderation pipeline - multi-system design owned end-to-end
- Optimised 18-table PostgreSQL schema to **sub-200ms response times** under production load; applied index strategy and query rewrite across the full data layer

Advice Bytes

May 2025 - Aug 2025

AI Engineer

- Built and trained an AI support chatbot on **20,000+ real interactions**, cutting inbound support volume by 30%
- Engineered GDPR-compliant AI guardrails achieving **87% compliance accuracy** - designed upfront as a core constraint, not a retrofit

Accenture

Oct 2023 - Aug 2024

Packaged App Developer

- Built automated ingestion pipeline handling **10,000+ files**, eliminating 15 hours of manual processing per week for the enterprise client
- Resolved .NET cross-system integration failures spanning three enterprise modules; diagnosed root cause and coordinated fix with client engineering teams

PROJECTS

Sentinel-AI LIVE

Agentic policy violation detection across multilingual social media content. Automated classification pipeline with multi-language support - real-world agentic AI applied to content governance.

Python · NLP · Agentic pipeline design

Contextual Ad Engine LIVE

Real-time AI system matching webpage context to relevant ads at under 100ms. Designed for production-grade latency requirements; demonstrates end-to-end AI solutions architecture under strict SLA.

Python · Real-time inference · Systems design

Venturella LIVE

Production web platform spanning multiple business verticals. Full-stack architecture from database layer to deployment - demonstrates scalable system design in a live commercial product.

JavaScript · Node.js · PostgreSQL · AWS

Lynk Browser

macOS developer browser built on Electron, React, and TypeScript. Demonstrates product thinking alongside engineering - designing tools for technical users.

Electron · React · TypeScript

EDUCATION

MSc Computer Science	University College Dublin	2024 - 2025
BTech Computer Science Engineering	Graphic Era University	2019 - 2023

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

Microsoft Azure AI Fundamentals

Python for Data Science, AI & Development - IBM

SKILLS

Languages: JavaScript, TypeScript, Python, Java, Swift, SQL

Frameworks & Platforms: Node.js, React, Spring Boot, AWS, Docker, Supabase, Kafka, Elasticsearch

AI & Cloud: Anthropic Claude API, Agentic AI pipelines, GenAI solutions, AWS (certified), PostgreSQL optimisation
