Dublin, Ireland

PROFESSIONAL SUMMARY

Technical product owner and engineer with ~2 years building and shipping fintech, AI, and compliance products in fast-paced environments. Managed two cross-functional intern teams, led product design across the full cycle - requirements gathering, system architecture, roadmap, and launch - and owns three live products in production today. Combines hands-on engineering depth with the product instincts to set success metrics, prioritise by ROI, and drive measurable outcomes under ambiguity. Strong fintech domain grounding: payment infrastructure (Stripe, PayPal, custom gateways), GDPR compliance, and AI-powered content moderation. Based in Dublin; MSc Computer Science, UCD.

CORE COMPETENCIES

Product Roadmap

Requirements Gathering

People Management

System Architecture

Success Metrics & KPIs

Cross-functional Delivery

ROI-based Prioritisation

Payment Systems

GDPR Compliance

Agentic AI / LLM

Agile Delivery

Stakeholder Management

EXPERIENCE

NomadEire Oct 2025 - Present (~7 months) | Dublin, Ireland

Software Engineer & Technical Product Owner

- Managed two intern teams end-to-end: defined work streams, ran sprint ceremonies, reviewed technical output, and was accountable for delivery timelines
- Led full product design cycle for the payment platform: ran stakeholder requirement sessions, defined system architecture, set success metrics, and owned the roadmap from ideation through launch and growth
- Built payment infrastructure integrating Stripe, PayPal, and a custom gateway - now processing live transactions across multiple merchant tiers
- Defined content moderation policy, shipped Claude API integration to production, and set quality KPIs - zero manual moderation backlog since launch
- Optimised 18 PostgreSQL tables to sub-200ms response times; set the target metric and held the team to it
- Iterated on merchant onboarding flow based on drop-off data in collaboration with design and operations stakeholders

Advice Bytes May 2025 - Aug 2025 (~4 months)

AI Product & Software Development Intern

- Led requirements gathering and architecture design for AI chatbot product; trained on 20,000+ customer interactions; shipped on schedule and reduced inbound support load by 30% within the first quarter
- Collaborated with legal team to define GDPR compliance requirements; designed and shipped automated guardrails achieving 87% accuracy, passing internal legal review
- Balanced product scope against a fixed 4-month timeline; cut lower-priority features to protect the core experience and hit the launch date

Accenture Oct 2023 - Aug 2024 (~1 year)

Packaged App Developer

- Delivered automated document ingestion pipeline for a financial services client (10,000+ files); eliminated 15 hours/week of manual processing and freed the operations team for higher-value work
- Resolved critical cross-system integration failures across three .NET enterprise modules; coordinated across client and internal engineering teams to diagnose, patch, and verify - unblocked a delayed delivery milestone
- Navigated ambiguous, multi-stakeholder delivery in a large financial services environment

LIVE PRODUCTS

Product	Domain	Key Outcome
NomadOps nomadops.online	Payments + AI moderation	Multi-provider payment platform with live transactions and Claude API content policy
Sector8 AI sector8.ai	AI support + compliance	30% support volume reduction; 87% GDPR compliance accuracy at scale
Venturella venturella.co	Multi-sector commerce	Production platform across multiple commercial verticals

SELECTED PROJECTS

- Contextual Ad Engine**
Real-time webpage-to-ad matching under 100ms. Defined requirements, designed distributed architecture, shipped end-to-end. Java, Kafka, Elasticsearch
- Sentinel-AI**
Multilingual policy violation detector for social media. Defined detection categories, built the pipeline, shipped to production. Python, Gemini API, AWS Lambda
- Lynk Browser**
Native macOS developer browser built and shipped end-to-end. Electron, React, TypeScript

EDUCATION

- MSc Computer Science** - University College Dublin2024 - 2025
- BTech Computer Science Engineering** - Graphic Era University2019 - 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- Microsoft Azure AI Fundamentals
- Python for Data Science, AI & Development - IBM

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, Java, Swift, SQL
- Frameworks & Tools:** React, Node.js, Spring Boot, AWS, Docker, Supabase, Kafka, Elasticsearch
- Domains:** Payment systems (Stripe, PayPal), GDPR compliance, agentic AI, content moderation, cloud infrastructure (AWS Lambda)
