PROFESSIONAL SUMMARY

Backend software engineer specialising in distributed systems, microservices, and REST APIs using JavaScript and Node.js. Built an event-driven pipeline processing 10,000 events/min with sub-100ms latency using Apache Kafka, delivered production payment and operations backends on AWS, and shipped features across a full Node.js microservices stack. JavaScript primary; Python and Java secondary. MSc Computer Science, UCD 2025.

CORE COMPETENCIES

JavaScript

Node.js

TypeScript

Python

Distributed Systems

Apache Kafka

REST APIs

Microservices

PostgreSQL

AWS

Docker

Elasticsearch

EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer · Dublin, Ireland

- Designed and built **Node.js microservices backend** with PostgreSQL and AWS (EC2, Lambda, S3, API Gateway)
- Delivered backend features from architecture through production; managed full deployment lifecycle in a startup environment
- Built distributed agentic workflows for automated data extraction and reporting pipelines integrating Claude and Gemini APIs
- Acted as Product Owner and sole engineer; participated in agile sprint cadences with cross-functional stakeholders

Advice Bytes May 2025 - Aug 2025

AI/ML Intern · Dublin, Ireland

- Built backend **NLP classification pipeline** using Python and scikit-learn achieving 87% GDPR compliance accuracy
- Integrated external LLM APIs with Supabase PostgreSQL backend; deployed serverless Node.js service on AWS Lambda

Accenture Oct 2023 - Aug 2024

Packaged App Developer · Bangalore, India

- Contributed to **microservices backend integrations** using Java and Spring Boot for financial services clients (APAC)
- Participated in agile ceremonies, sprint planning, and cross-team code reviews in an enterprise engineering organisation

SELECTED PROJECTS

Kafka Ad Engine

Real-time advertising event processing pipeline handling **10,000 events/min with sub-100ms latency**. Demonstrates distributed backend systems engineering at production scale.

Stack: Apache Kafka, Node.js, Elasticsearch, AWS EC2, Docker

Venturella

Full-stack payments platform backend with REST API layer, sub-200ms PostgreSQL query performance, and end-to-end user flows including onboarding, KYC, payment processing, and reporting.

Stack: React, Node.js, PostgreSQL, Stripe API, Docker, AWS

NomadOps

Internal operations platform delivered end-to-end as sole engineer and Product Owner. Microservices backend with agentic workflows for automated data extraction and reporting.

Stack: React, Node.js, Electron, PostgreSQL, Claude API, Gemini API, AWS

Sentinel-AI

Fraud detection backend system achieving 84% accuracy across 10,000+ transactions with sub-500ms inference latency. Reduced manual review workload by 60%.

Stack: Python, scikit-learn, NLP text classification, PostgreSQL, AWS EC2

EDUCATION

MSc Computer Science - University College Dublin (UCD) Dublin, Ireland · 2:1	2024-2025
BTech Computer Science - Graphic Era University India · 9.2/10 CGPA	2019-2023

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL	Backend: Node.js, REST APIs, Microservices, Spring Boot, Distributed Systems
Frontend: React, Tailwind CSS, Electron	Data/Streaming: Apache Kafka, Elasticsearch, PostgreSQL, Supabase
Cloud and Infra: AWS (EC2, S3, Lambda, API Gateway), Docker	Process: Git, Agile/Scrum, Product Ownership, Technical Documentation
