PROFESSIONAL SUMMARY

TypeScript and Node.js backend engineer with production experience in payment systems, event-driven analytics pipelines, and cloud-native AWS infrastructure. Built a real-time event pipeline processing 10,000 events/min, delivered a full payment API with sub-200ms PostgreSQL performance, and shipped agentic microservice platforms from zero to production. AWS-native cloud engineer (EC2, Lambda, S3); familiar with GCP core concepts. MSc Computer Science, UCD 2025.

CORE COMPETENCIES

TypeScript

Node.js

Payment Systems

Event-Driven Architecture

REST API Design

PostgreSQL

Microservices

Docker

AWS

Apache Kafka

API Integration

React

EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer · Dublin, Ireland

- Led backend delivery of NomadOps using **Node.js microservices**, PostgreSQL, and AWS (EC2, Lambda, S3, API Gateway)
- Designed and shipped **subscription-style service architecture** with multi-agent agentic pipelines for automated reporting and data extraction workflows
- Built REST API endpoints supporting real-time operations; acted as Product Owner from discovery through production release
- Containerised services with **Docker**; integrated TypeScript across backend with cloud-native AWS deployment

Advice Bytes May 2025 - Aug 2025

AI/ML Intern · Dublin, Ireland

- Built AI chatbot backend integrating **Claude API and OpenAI API** with Supabase PostgreSQL for conversation storage
- Implemented NLP classification pipeline achieving **87% GDPR compliance accuracy** using Python and scikit-learn
- Deployed serverless backend on **AWS Lambda**; reduced inbound support queries by 30%

Accenture Oct 2023 - Aug 2024

Packaged App Developer · Bangalore, India

- Delivered enterprise **REST API integrations** using Java and Spring Boot for financial services clients across APAC
- Contributed to microservices architecture with agile ceremonies, sprint planning, and cross-team code reviews

SELECTED PROJECTS

Venturella

Full-stack payments platform with a complete payment layer, sub-200ms PostgreSQL query performance, and end-to-end user flows: onboarding, KYC, payment processing, and reporting dashboard.

Stack: React, Node.js, PostgreSQL, Stripe API, Docker, AWS

Kafka Ad Engine

Real-time advertising event processing pipeline handling **10,000 events/min with sub-100ms latency**. Demonstrates analytics backend engineering at production scale.

Stack: Apache Kafka, Node.js, Elasticsearch, AWS EC2, Docker

NomadOps

Internal operations platform delivered end-to-end as sole engineer and Product Owner. Agentic workflows for automated reporting; multi-agent pipelines integrating Claude and Gemini APIs.

Stack: React, Node.js, Electron, PostgreSQL, Claude API, Gemini API, AWS

Sentinel-AI

Fraud detection system achieving 84% accuracy and reducing manual review workload by 60%. Evaluated 10,000+ transactions with sub-500ms inference latency.

Stack: Python, scikit-learn, NLP text classification, PostgreSQL, AWS EC2

EDUCATION

MSc Computer Science - University College Dublin (UCD) Dublin, Ireland · 2:1	2024-2025
BTech Computer Science - Graphic Era University India · 9.2/10 CGPA	2019-2023

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL **Backend:** Node.js, REST APIs, Microservices, Spring Boot
Frontend: React, Tailwind CSS, Electron **AI/ML:** Claude API, OpenAI API, Gemini API, Agentic Workflows, NLP, scikit-learn
Cloud and Infra: AWS (EC2, S3, Lambda, API Gateway), Docker, PostgreSQL, Apache Kafka, Elasticsearch, Supabase
Process: Git, Agile/Scrum, Product Ownership, Technical Documentation
