PROFESSIONAL SUMMARY

TypeScript and Node.js backend engineer building production REST APIs, SQL database systems, and cloud-native infrastructure on AWS. Delivered a full payment backend with sub-200ms PostgreSQL performance, a real-time event pipeline at 10,000 events/min, and multi-service architectures with REST API design across multiple production projects. Strong SQL and PostgreSQL expertise; deployment experience across EC2, Lambda, and API Gateway. MSc Computer Science, UCD 2025.

CORE COMPETENCIES

TypeScript

Node.js

JavaScript

REST APIs

PostgreSQL

SQL

AWS

Docker

React

Backend Systems

API Design

Microservices

EXPERIENCE

NomadEire Oct 2025 - Present

Software Engineer · Dublin, Ireland

- Built production **TypeScript and Node.js backend platform** with REST API layer, PostgreSQL schema design, and AWS infrastructure (EC2, Lambda, S3, API Gateway)
- Designed multi-service backend architecture with API gateway routing, access control, and cloud-native deployment
- Acted as Product Owner and sole engineer; shipped features from discovery to production with full backend ownership
- Integrated third-party APIs (Claude API, Gemini API) with Docker containerisation across backend services

Advice Bytes May 2025 - Aug 2025

AI/ML Intern · Dublin, Ireland

- Integrated third-party APIs (Claude, OpenAI) with **token-based authentication** and GDPR-compliant data handling
- Built Supabase PostgreSQL backend with conversation storage schema and retrieval queries; deployed Node.js service on AWS Lambda
- Reduced inbound support queries by 30%; achieved 87% accuracy in NLP classification pipeline

Accenture Oct 2023 - Aug 2024

Packaged App Developer · Bangalore, India

- Delivered enterprise **REST API integrations** using Java and Spring Boot for financial services clients across APAC
- Contributed to backend architecture discussions, agile ceremonies, and cross-team code reviews

SELECTED PROJECTS

Venturella

Full-stack payments backend with REST API design, sub-200ms PostgreSQL performance, and end-to-end user flows: onboarding, KYC identity verification, payment processing, and reporting dashboard.

Stack: React, Node.js, PostgreSQL, Stripe API, Docker, AWS

NomadOps

Multi-service backend operations platform delivered end-to-end as sole engineer. REST API design, PostgreSQL schema management, cloud-native AWS deployment, and agentic workflow integration.

Stack: React, Node.js, Electron, PostgreSQL, Claude API, Gemini API, AWS

Kafka Ad Engine

Real-time event processing backend handling 10,000 events/min with sub-100ms latency. High-performance distributed backend with Elasticsearch query layer.

Stack: Apache Kafka, Node.js, Elasticsearch, AWS EC2, Docker

Sentinel-AI

Backend fraud detection system processing 10,000+ transactions with 84% ML accuracy. Sub-500ms inference latency; reduced manual review workload by 60%.
Stack: Python, scikit-learn, NLP, PostgreSQL, AWS EC2

EDUCATION

MSc Computer Science - University College Dublin (UCD) Dublin, Ireland · 2:1	2024-2025
BTech Computer Science - Graphic Era University India · 9.2/10 CGPA	2019-2023

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL **Backend:** Node.js, REST APIs, Microservices, Spring Boot, API Design
Frontend: React, Tailwind CSS, Electron **Database:** PostgreSQL, SQL, Supabase, Elasticsearch, NoSQL
Cloud and Infra: AWS (EC2, S3, Lambda, API Gateway), Docker, Apache Kafka
Process: Git, Agile/Scrum, Product Ownership, Technical Documentation
